

NKGH Type Manual Grease Pump

NKGH-1004 • NKGH-1008 • NKGH-1804

Hand-lever grease pump delivering 1.2 or 1.8 cc per stroke at 10 MPa, with left and right outlets on M10×1.

	DISCHARGE 1.2 or 1.8 cc / stroke	WORKING PRESSURE 10 MPa
	RESERVOIR 0.5 L / 1 L	GREASE NLGI 000# – 1#

HOW IT WORKS

Reciprocating the handle delivers grease to a grease separator or to a dosing distributor, and from there to each lubrication point. On a resist-type circuit the grease is delivered in proportion; on a U type or SD progressive circuit the metered charge is delivered to each point in sequence.

Two outlets are provided, one covered by a blank plug. Remove whichever suits the installation — left, right or both. On a progressive circuit only one outlet may be used.

SPECIFICATION

Type	Manual hand-lever grease pump
Reservoir material	PC
Outlet thread	M10×1
Suitable grease	NLGI 000# – 1#
Working pressure	10 MPa
Pressure take-off	Not fitted

NKGH TYPE MANUAL GREASE PUMP

MODEL SELECTION

MODEL	DISCHARGE CC/ST	WORKING PRESSURE	RESERVOIR	OUTLETS
NKGH-1004	1.2	10 MPa	0.5 L	Left and right
NKGH-1008	1.2	10 MPa	1 L	Left and right
NKGH-1804	1.8	10 MPa	0.5 L	Left

GUIDE TO ORDER

NKGH-1804

NKGH lubrication pump · 1.8 cc/stroke discharge · 0.5 L reservoir.

1	Code of lubrication pump	NKGH
2	Discharge capacity	10 = 1.2 cc/st · 18 = 1.8 cc/st
3	Reservoir capacity	04 = 0.5 L · 08 = 1 L

DIMENSIONS Ask us for the dimensioned drawing before machining a mounting.**APPLICATIONS**

Engineering machinery
Weaving machinery
Printing machinery
Machine tools
Filling PJ series pump reservoirs

SYSTEM PAIRING

U type progressive distributor
SD type progressive distributor
Resist-type proportion distributors

CHECK BEFORE ORDERING

On a progressive circuit use one outlet only, with the second left plugged. Two live outlets break the progressive sequence.

No pressure take-off mechanism. It cannot cycle an RH, 34 or 35 type volumetric distributor.
